The Penn Air Group Opens another Office in the Pacific Rim; this time in Beijing China

Los Angeles, CA - September 28, 2007 - According to Herman Philhower, Founder and CEO of The Penn Air Group, “opening this office reinforces our commitment to developing the Asian marketplace...and as China’s Capital, (Beijing) represents an enormous opportunity with their explosive 10% per annum growth rate, poor air quality and the upcoming Summer Olympics...Where there’s indoor air quality issues and high energy costs, we can provide a “*TotalCare*” solution” says Mr. Philhower. The Beijing office adds to their Asia portfolio which currently includes Seoul Korea and the Territory of Guam. Two additional China mainland offices are planned for 2008.

Overseeing business functions is Ms Jennifer Yan Wang, Vice President Asia Operations. Ms Wang has over 20-years business experience in China, holds both a Bachelor degree from the Liaoning Institute of Economic Management, a Construction Engineering Certificate and is a legal representative of the Science & Technology Trading Company Ltd.

About The Penn Air Group

The Penn Air Group is a privately held firm focused on optimizing HVAC systems. Service divisions include Whole Building Commissioning (Cx), Test and Balance Engineering (TAB), Commercial/Industrial HVAC Cleaning and Restoration, Mold Remediation and Indoor Air Quality Investigations. Products include 3M Commercial HVAC Filtration and Window Films. This unique combination of products and services provides a comprehensive, engineering approach towards dramatically lowering HVAC related energy costs. Benefits include a healthy indoor environment, load reductions to the grid, asset preservation and reduced greenhouse gas emissions. Each project is designed to meet the specialized needs of commercial buildings, hospitals and industrial facilities. The Penn Air Group is an EnergyStarTM partner and a member of AABC, ACG, AIHA, ASHRAE, IKECA and NADCA.
